GORE-TEX® Fabric – Durable comfort and protection against weather

Long-Lasting Protection from Inclement Weather

Keeping dry and comfortable as a patrol officer allows you to focus on the necessary tasks to perform your job successfully. GORE-TEX® fabrics keep you drier, warmer, and more comfortable in all types of weather. These fabrics are completely waterproof, even after exposure to a wide variety of conditions that cause other barrier products to break down. GORE-TEX® fabrics also keep you significantly warmer by blocking the wind and preventing body heat from escaping.

Continued Comfort

As a patrol officer, you need to remain comfortable whether you are working a traffic detail or making an arrest. Highly breathable GORE-TEX® fabrics improve comfort by allowing perspiration to escape from the garment or boots, reducing heat stress and keeping you, your clothing, and your boots drier. This high level of breathability combined with excellent protection against inclement weather allows you to stay dry and comfortable with a more flexible garment that has fewer layers.

Maximum Durability

Rigorous physical activity is an essential component of a patrol officer's job, so your outerwear must be durable. GORE-TEX® fabrics are engineered to last up to three times as long as other waterproof fabrics without compromising your protection or comfort. This fabric maintains its outstanding protection over time, even after exposure to contaminants such as DEET insect repellent, gun cleaner, and gasoline, as well as to repeated wash/dry cycles. To ensure this level of protection, the seams of each garment made with GORE-TEX® fabric are sealed with a proprietary technology developed by Gore. The result is a durable fabric that you can count on to protect you even in the harshest weather.

Solutions for All Your Needs

W. L. Gore & Associates has developed durable GORE-TEX® fabrics with a variety of textiles to provide waterproof protection with additional features such as high visibility, abrasion resistance, and anti-static protection. For assignments that keep you outside in all types of weather, be assured that there is a GORE-TEX® fabric that meets your garment, glove, and footwear needs.

The Gore Advantage

For 30 years, W. L. Gore & Associates has been a pioneer in developing high-performance barrier fabrics for law enforcement, domestic preparedness, firefighting, EMS, technical rescue, and military applications. Contact a Gore sales associate today for assistance in selecting the right barrier product for your specific application.

WARNING: No products, including garments, footwear, and gloves, protect completely, even when new; their protective performance will decline with wear, tear, abrasion, and other damage associated with use.
