

GORE-TEX PRODUCTS

DURABLY WATERPROOF,
WINDPROOF, VERY
BREATHABLE PROTECTION

GORE-TEX products are suited for a wide range of designs and adaptable for specific needs and requirements. This product technology can be combined with other material offerings to meet the performance standards required by the user. The GORE-TEX fabric portfolio allows designers to choose from a unique combination of textiles which are suitable for both warmer and colder conditions.

GORE-TEX PRODUCT TECHNOLOGY

- Water stays out
- No wind chill
- Sweat vapor can escape
- Available in a 2-layer, 3-layer fabric, or insulated liner construction
- Material combinations include a lightweight or more abrasion resistant textile, THERMIUM® insulation, GORE-TEX stretch fabric, and GORE-TEX PYRAD® product technology

TECHNOLOGY APPLICATIONS

Choose the technology application that best meets the specific needs of the user.

GORE-TEX GARMENTS

GORE-TEX garments are not only world-renowned for their protective performance and comfort, but they are also tested and proven. These fabrics are durably waterproof, windproof, and breathable, keeping users dry and comfortable.

Combining GORE-TEX laminates with additional protective technologies can make them ideal for some of the most demanding professions.

GORE-TEX FOOTWEAR

Most outdoor activities stop being comfortable the moment your feet get cold or wet. This is why Footwear engineered with GORE-TEX fabric technology is a staple on trails and battlefields around the world. Durably waterproof, breathable, and lightweight protection provides the comfort users need in a wide range of conditions.

GORE-TEX GLOVES

GORE-TEX gloves are durably waterproof, windproof, and breathable and allow for exceptional dexterity. Finger movement is not restricted, yet hands remain dry, warm, and comfortable, even when under heavy strain.

LAB TESTED FOR SUPERIOR PERFORMANCE
