

WINDSTOPPER® PRODUCTS BY GORE-TEX LABS

TOTAL WINDPROOFNESS & MAXIMUM BREATHABILITY

Wind speed and strength greatly affect how cold it can feel during outdoor missions. Products made with WINDSTOPPER® fabrics by GORE-TEX LABS are totally windproof and deliver maximum breathability to reliably keep users comfortable in windy conditions. This product technology can be combined with other material offerings to meet the performance standards required by the user— some of these combinations include a lightweight or more abrasion resistant textile.

WINDSTOPPER® PRODUCT TECHNOLOGY BY GORE-TEX LABS:

- No wind chill
- Sweat vapor can escape
- Weather protection
- Lightweight and flexible
- Air permeability of less than 1.0 cfm (<5 l/m²s)
- Available in a 2-layer, 3-layer fabric, or insulated liner construction
