AIR FORCE APECS PARKA & TROUSER WITH GORE-TEX® FABRIC

This parka and trouser made with GORE-TEX® fabric provides exceptional comfort and protection with a lighter-weight, less bulky construction.

This multi-purpose garment is designed for use in even the harshest conditions. Features include new n-IR signature reduction technology, which is durable for the life of the fabric.

The construction uses a proprietary GORE-TEX® fabric that is 40-percent softer and quieter than previous fabrics to help you operate more effectively. Increased breathability provides comfort across a broader temperature range. The wearer stays drier longer and in higher levels of activity.

Only routine machine washing and drying is required to maintain performance and extend the life of the garment.

For more than 30 years, W. L. Gore & Associates, Inc. has developed high-performance fabrics that withstand the harsh environments military, law enforcement, fire and rescue professionals encounter on their missions. Gore combines research in the fundamental science of fluoropolymers with a thorough understanding of the challenges these professionals face to engineer durable protective fabrics. After extensive laboratory testing and field trials, Gore stands behind these fabrics, ensuring that each product does what we say it will do.

PERFORMANCE ENHANCING DESIGN FEATURES

- USAF Tiger Stripe camouflage pattern for woodland, desert and urban environments.
- Roll 'n' stow hood, redesigned pockets, non-wicking barriers at hems and cuffs
- Versatile protection for cold and wet weather, even protection against wind and sand in dry conditions.
- Durably waterproof, windproof and breathable even after laundering and exposure to DEET, contaminants and oils.
- n-IR signature reduction technology is durable for the life of the fabric.
- Fully spec and Berry compliant. Made in the USA.
