

ARMY 3RD GEN ECWCS EXTREME COLD/WET LEVEL 6 JACKET & TROUSER WITH GORE-TEX® FABRIC

Lighter weight without sacrificing
comfort and protection

ARMY 3RD GEN ECWS EXTREME COLD/WET LEVEL 6 JACKET & TROUSER WITH GORE-TEX® FABRIC

The Generation III Extended Cold Weather Clothing System (ECWCS) features a lightweight, waterproof, breathable and extremely packable hardshell jacket and trouser made with GORE-TEX® fabric. It is designed for use in wet, high wind, and extreme cold conditions.

Pieces can be worn individually or in combination with other levels of the Gen III ECWCS System.

The GORE-TEX® fabric combines a nylon outer material, a durably waterproof and windproof GORE-TEX® membrane, and a nylon liner. The wearer is protected from not only cold and wet weather, but also from wind and sand. Increased breathability provides comfort across a broad temperature range keeping the wearer drier longer even in higher levels of activity.

Only routine machine washing and drying is required to maintain performance and extend the life of the garment.

For more than 30 years, W. L. Gore & Associates, Inc. has developed high-performance fabrics that withstand the harsh environments military, law enforcement, fire and rescue professionals encounter on their missions. Gore combines research in the fundamental science of fluoropolymers with a thorough understanding of the challenges these professionals face to engineer durable protective fabrics. After extensive laboratory testing and field trials, Gore stands behind these fabrics, ensuring that each product does what we say it will do.

PERFORMANCE ENHANCING DESIGN FEATURES

- U.S. Army universal camouflage pattern for woodland, desert and urban environments.
- 50% lighter than the previous generations of ECWCS.
- One pound lighter and 1/2 cube (pack volume) of the improved rain suit.
- Roll 'n' stow hood, redesigned pockets, non-wicking barriers at hems and cuffs.
- Durably waterproof, windproof and breathable even after laundering and exposure to DEET, contaminants and oils.
- n-IR signature reduction technology is durable for the life of the fabric.
- Made in U.S.A.
