

MARINE CORPS COMBAT DESERT JACKET

Increased Protection for Harsh Desert Conditions

Military Fabrics

MARINE CORPS COMBAT DESERT JACKET

The Combat Desert Jacket (CDJ) is the most comfortable, lightest weight, windproof soft shell jacket made for desert operations. It is intended to provide Marines increased protection from the unique environmental challenges of the desert.

Different fabrics are customized for use in each part of the jacket so that the wearer receives the highest level of protection and comfort during changing desert environments.

Strategically placed stretch zones provide increased flexibility and mobility. A moisture-wicking lining and highly breathable fabric reduces heat stress during the day and helps maintain a steady core body temperature at night. A high performance fiber system made with 99.9% pure silver safely inhibits the growth of odor-causing bacteria and fungi in the garment without added unnecessary weight.

Only routine care is needed to keep the garment functioning at its peak levels and extends its life.

For more than 30 years, W. L. Gore & Associates, Inc. has developed high-performance fabrics that withstand the harsh environments military, law enforcement, fire, and rescue professionals encounter on their missions. Gore combines research in the fundamental science of fluoropolymers with a thorough understanding of the challenges these professionals face to engineer durable protective fabrics. After extensive laboratory testing and field trials, Gore stands behind these fabrics, ensuring each product does what we say it will do.

PERFORMANCE ENHANCING DESIGN FEATURES

- Image Suppression Technology provides a significant reduction in n-IR visibility and is durable for the life of the fabric.
- X-Static®, the Silver Fiber®, provides anti-microbial and odor protection.
- Waterproof entry and relief zippers, fasteners and adjustment hardware are made of non-corroding materials.
- Made in the U.S.A.
