cinch for
secure and
comfortable fit

Concealed
stitching
improves
glove life

Breathable GORE-TEX® barrier and lining with moisture management keeps hands dry, improves thermal management – cool in summer, warm in winter – and provides a soft, cool feeling

FUEL HANDLER GLOVE (POL) WITH GORE-TEX® FABRIC

The GORE-TEX® POL Fuel Protective Glove is a comfortable, protective glove that is an alternative to traditional choices like rubber gloves or no-barrier gloves.

This glove provides durable JP-8 protection combined with superior dexterity and sensitivity so you can perform a complex range of activities.

The core of the glove is made with a GORE-TEX® lining. This waterproof but breathable layer is impervious to liquid but still allows moisture vapor to escape. This keeps hands dry and protected while preventing clammy hands from perspiration build up. Rubber gloves cannot match this comfort.

The GORE-TEX® glove insert with DIRECT GRIP® technology combines barrier and liner to give protection and the ability to perform a complex range of activities.

For more than 30 years, W. L. Gore & Associates, Inc. has developed high-performance fabrics that withstand the harsh environments military, law enforcement, fire, and rescue professionals encounter on their missions. Gore combines research in the fundamental science of fluoropolymers with a thorough understanding of the challenges these professionals face to engineer durable protective fabrics. After extensive laboratory testing and field trials, Gore stands behind these fabrics, ensuring each product does what we say it will do.

PERFORMANCE ENHANCING DESIGN FEATURES

- 100% Waterproof, Windproof & Breathable.
- Penetration-resistant to JP-8 and other POLs.
- Less bulk allows good grip strength and tactile sensing of tools and electronic controls.
- Concealed stitching for longer shell life.
